DISCOVER · REVIEW · CONNECT

People on NOS

Find creative professionals, understand their profile cards, and start a connection or conversation.

The Hub > People opens the **NOS Talent Hub**. Start with discovery sections, or use Search and the funnel-shaped filter icon to narrow your results.

1 Search, filter, and sort

Type a **name, professional title, skill, or location** in the search field. Results update as you type; partial matches work. Select × in the search field to clear just the search text.

SORT & FILTER · ILLUSTRATIVE MENU

Sort by Name (A-Z) · default
Sort by Name (Z-A)

Filter by Professional Title
Filter by Experience
Filter by Availability
Filter by Skills
Filter by Location

Clear Filters

Apply a filter

1. Select the **funnel icon**, then a filter type.
2. Check one or more choices. Use **Select All / Deselect All** if helpful.
3. Select **Apply Filters** to confirm.
4. Repeat for other filter types, or choose a name-sort option to change the order.

Search, filters, or reverse sorting change the home page's Trending area to **Search Results**.

Filter	What it matches
Professional Title	The person's listed role, such as Concept Artist, Composer, or Producer.
Experience	Entry Level; Junior (2-5 Years); Mid-Level (5-10 Years); Senior (10+ Years).
Availability	Available, Open to Offers, Busy, On Hiatus, Full-Time, Part-Time, or Contract/Freelance.
Skills	Listed professional tools or skills, such as Blender, Nuke, or Pro Tools.
Location	A listed location selected from the menu.

Combine and reset: Choices within one filter type are alternatives; different filter types narrow results together. Remove a filter chip with ×. **Clear Filters** clears the search and all filter selections and restores **Name (A-Z)**.

No matching people? Try a broader search, remove a filter, or clear filters. The search-and-filter controls are also available in the expanded Trending and All NOS Talent views.

2 Understand the discovery sections

Trending on NOS

A featured discovery area highlighting people to explore. It is not a verified popularity or performance ranking, and the screen does not specify a ranking formula.

View All Trending

Opens the expanded Trending list with Search and Sort & Filter. Select **VIEW MORE** when available to reveal more profiles; use the back arrow to return.

New to NOS

Introduces talent presented as new arrivals to the NOS community. The **NEW** badge identifies these introductions; it does not describe experience level.

VIEW ALL NOS TALENT

Opens **All NOS Talent**, the broader directory—not just new arrivals. Search, filter, and sort here; select **VIEW MORE** for additional results.

Role Demand FEATURE PREVIEW

Previews “Most searched roles this week” with role names and growth percentages. It illustrates demand information, not a list of open Work Cards. Treat the figures as preview values rather than verified live analytics.

Recommended for You

Suggestions presented as relevant to your project. Read the context below the name—for example, “Based on your project ‘Neon Horizon’.” Select a person to open their profile. **Load More** reveals additional suggestions.

3 Read a profile card

ILLUSTRATIVE CARD · DETAILS VARY BY VIEW

Card detail	Quick reference
NEW / RECOMMENDED	NEW marks a new-arrival introduction. RECOMMENDED identifies a suggested person; it is not an endorsement or guarantee of fit.
Favorite icon ★	A yellow star beside the avatar indicates a favorite. It is a status indicator on People cards, not a clickable favorite toggle.
Availability	Available / Open to Offers: open to discussing work. Busy: occupied. On Hiatus: taking a break. Confirm timing directly before making plans.
Location	The listed city or region and country; it is not a guarantee of travel availability or time-zone compatibility.
Professional Skills	Tags show listed skills and tools. The professional title identifies the primary role. Review the full profile for context and examples.

4 View a profile

People > View Profile on the person's card or row.
In **Recommended for You**, select the person's row to open their profile.

Review the person's professional title, **About** section, **Skills & Tools**, and work examples. Use the back arrow to return to People or the directory view you came from.

5 Connect with a person

People > View Profile > Connect

1. Open the person's profile and confirm you have the right person.
2. Select **Connect** near the top of the profile.
3. The button changes to **REQUESTED**. This is the request state—not an accepted connection.

PROFILE ACTIONS · ILLUSTRATIVE STATES

When a profile is an existing connection, it shows **Connected** instead. Such profiles may also offer **Add to Favorites** or **Favorite**; those controls are separate from requesting a connection.

6 Message a person

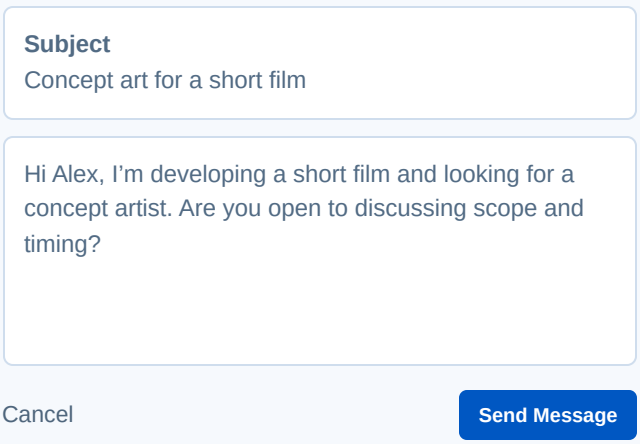

People > View Profile > Message

Write and submit

1. Select **Message** on the profile.
2. In **Message to [name]**, add a useful **Subject** (optional) and write your message.
3. Select **Send Message**. It is enabled only when the message contains text.
4. The window closes and the interface shows a **Message Sent** confirmation.

Cancel closes the message window without sending. The Message action is available on another person's profile without first selecting Connect.

MESSAGE WINDOW · EXAMPLE

Illustration, not an application screenshot.

Start with useful context: Introduce yourself, name the Digi-Pitch or opportunity, describe the work briefly, and ask about interest and availability. A connection request or message is not a work assignment or agreement.
