NOS STUDIO

Paid Work Card Offers & Stripe Connect

Alpha Quick User Guide

What this guide covers
How a paid Work Card offer moves from review to acceptance and into the real Stripe Connect payment flow in the current NOS Alpha.

1 **Review the paid Work Card offer**
Confirm the Project, Work Card, scope, deliverable, compensation amount, and any other terms shown before you accept. Acceptance is an economic action, not simply an expression of interest.

2 **Confirm your payment setup**
NOS uses Stripe Connect for real payments in Alpha. If the application prompts you to complete or update Stripe Connect setup, follow that payment-account flow before continuing.

3 **Accept the offer**
Accept the paid Work Card offer only when the displayed terms are the terms you intend to accept. **Accepting a paid Work Card offer triggers a real payment through Stripe Connect.**

4 **Verify the result**
After acceptance, confirm the Work Card / Commitment state in NOS and verify the resulting payment information shown by the application or your connected Stripe account.

What Alpha means economically

Current Alpha: NOS does not charge a NOS platform fee merely for using Alpha and does not require IP or revenue participation by NOS Studio simply because a Project uses the platform. A paid Work Card is a participant-to-participant economic commitment under its displayed terms.

Important

• **Review before accepting.** Because acceptance triggers a real payment flow, do not use Accept as a test button.

• **Terms remain explicit.** A payment does not create additional ownership, revenue participation, or authority beyond the terms that were actually agreed.

• **Use the current application as the source of truth.** This guide describes the current Alpha payment flow; labels and screen layout may evolve as Alpha is updated.
